- synthetics, 336
- ## T
- Tahitian vanilla, 41
- tea tree oils, estrogenic activity, 119–122  
 commercially available oils, 130  
 oil composition, 127–128  
 safety assessment, 130–131  
 topical application, 129–130
- terpene isolongifolene, Cedarwood oils, 97
- terpenics, essential oils, 71–72  
 analysis, 72–77  
 methodology, 72  
 US patented uses, 77–79
- terpenoids, essential oils, 71–72  
 analysis, 72–77  
 methodology, 72  
 US patented uses, 77–79
- testing, estrogenic activity, 121–122
- Texas cedar, 91

traditional aromatherapy, 18–19

Tzu, Sun, *Art of War*, 2–4

## U–V

Uganda vanilla, 41

vanilla

aroma and flavor, 38–40

challenges

future, 511–512

novel applications, 509

pricing effects, 508–509

sourcing, 509–511

year ahead, 507–508

chemical constituents, 34–38

chemistry, 33–34

fragrance effect on mood, 16

glucovanillin biosynthesis in green

vanilla beans, 42

qualitative differences among  
species, 41–42

Vetiver Bouquet No. 9, cedarwood  
derivatives, 103

Vetiver oils

chemical composition, 81–83

fragrance compounds, 86–88

imitations, 85

synthetic compounds, 83–84

vibrational theory, 271

Violet Bouquet No. 6, cedarwood soap  
formulas, 115

Violet, cedarwood derivatives, 105

volatiles, vanilla, 35–37

volatility, 336

## W–Z

Wilde, Oscar, fragrance effect on mood, 15

Woody Base No. 8, cedarwood deriva-  
tives, 103

Woody Bouquet No. 7, cedarwood

derivatives, 101

woody notes

Cedarwood oils

application, 97

chemical composition, 92–95

derivatives, 95–97

mode of production, 92

origin, 91–92

perfume derivatives, 99–107

soap fragrance derivatives,  
109–118

terpene isolongifolene

synthesized compounds, 97

Vetiver oil, chemical composition,  
81–83

Vetiver oils

fragrance compounds, 86–88

imitations, 85

synthetic compounds, 83–84

vegetable-derived proteins, 28–29

vitamin C, antiaging product  
ingredients, 40
