

Index

A

Acne keloidalis, ethnic scalp disorders, 64
actives, silicones, 169–170
Adenosine, anti-hair loss agent, 83
aerosol hair sprays, modern styling technology, 276–278
alkylmethylsiloxanes, SPF enhancement, 171–174
Allergic contact dermatitis, ethnic scalp disorders, 64
amide shampoos, hair care formulary, 559
Aminexil, anti-hair loss agent, 83
anionic/cationic complexes, 211–213
 foam testing, 214–215
 testing methods, 214
anionic organosilicones, 217–218
 conditioning efficacy, 224–228
 formulations, 228–229
 quats with carbomer compatibility, 219–220
 silicone-quat mole ratios, 220–224
 silicones, 218
anti-frizz hair gels, hair care formulary, 569
anti-hair loss, agents, 83
antiaging hair care, Johnson, Beth
 benefits, 384–385
 research, 383–384
antibacterial shampoos, hair care formulary, 559
antichaotropic salts, cysteine stabilizer, 341–346
antidandruff shampoos, hair care formulary, 559
Asia Pacific, development trends, 9
Asian hair, 49–50
 market, 50–51
 properties and physiology, 51–54
 protection, 54–56
 softness measurement, 56–59
 United States, 51
Azeleic acid, anti-hair loss agent, 83

B

baby shampoos, hair care formulary, 556
bending rigidity, 57
bimodal polymers, mousses, 321–323
biology (hair), 71–72
 cortex, 75–77

 cuticle, 73–75
 shaft lipids, 77–78
 simple physical structure, 72–73
body, silicone quaternary microemulsions, 235–239
Brazil, sales boost, 10
breakage, racial hair variations, 61–62

C

care benefits, vegetable esters
 effects on hair, 158–166
 functions in cleansing, 155–158
categories, hair care growth, 1–2
cationic guar
 conditioning and repair performance, 185–188
 hair surface management, 183–185
 sensorial benefits, 188–193
cationic polymers, styling mousses, 318–321
Celquat LS-50, 5
Central centrifugal cicatricial alopecia, ethnic scalp disorders, 64, 66–67
chemical straightening, ethnic hair grooming, 63
China, sales boost, 10
Ciba, rheology modifier, 527–530
cigarette smoke, keratin biopolymers hair protection, 438
clear conditioning shampoos, hair care formulary, 558
clear emulsions, refractive index matching, 347
 deviations, 356–359
 physical principle, 347–352
 skin care products, 352–354
clear mild shampoos, hair care formulary, 561
clear shampoos, Silicone Amino Elastomer Emulsion formulation, 308
coal tar, antidandruff activity, 137–139
color-boosting conditioning shampoos, hair care formulary, 562
coloring hair
 controlling progressive process, 387–388
 conclusions, 393–394
 method, 390–392
 theory, 388–390
 European Union (EU) regulations

- soothing dandruff shampoos, hair care formulary, 563
- spectrometer analysis, conditioners, 118–119
- SPF, enhancement with alkylmethylsiloxanes, 171–174
- straightening
 - ethnic hair grooming
 - chemical, 63
 - thermal, 62–63
 - hair products, 26–27
 - polymers, 292–293
- strengthening
 - consumer desires, 7–8
 - silicones
 - assessing hair strength, 202–206
 - mechanisms for hair strengthening, 206–208
 - new role, 201–202
- styling
 - agents downward trend, 11–12
 - emulsion design for relaxer actives, 311–312
 - emulsifiers, 312–313
 - ideal base, 315–316
 - relaxer basics, 313–315
 - ethnic hair, 31–32
 - gels, hair care formulary, 566
 - innovations, 27–28
 - low VOC formula strategies, 274–276
 - modern trends, 276–279
 - packaging, 279–280
 - technology history, 271–274
 - mousse polymers
 - bimodal, 321–323
 - cationic, 318–321
 - L'Oreal authors, 317–318
 - recent patents, 323–326
 - polymers
 - conditioners, 293–295
 - gels, 291–292
 - hair fixatives, 283–291
 - straightening hair, 292–293
 - VP/methacrylamide/vinylimidazole copolymer, 361–363
 - product hair care formulary, 564–568
 - Silicone Amino Elastomer Emulsion, 297–298
 - easy formulation, 305–309
 - multifunctional properties evaluation, 299–305
 - styling resins, polyimide-1 performance evaluation, 327–329
 - coefficient of friction, 336–337
 - flexibility, toughness, and durability, 333–336
 - formulation, 338–339
 - formulation clarity, 331–333
 - gel film clarity, 331
 - high humidity curl retention, 329–330
 - salon volume and body evaluation, 337–338
 - water resistance, 329–330
 - sulfate-free shampoos, hair care formulary, 559
 - sulfur dioxide gases, keratin biopolymers hair protection, 440–441
 - sun protection daily shampoos, hair care formulary, 560
 - superhold sculpting taffy, hair care formulary, 567
 - supplier listings, 576–577
 - surfactants
 - anionic/cationic complexes, 211–213
 - foam testing, 214–215
 - testing methods, 214
 - cationic guar, 183–185
 - conditioning shampoo polymers, 128
 - relaxers emulsions design, 311–312
 - emulsifiers, 312–313
 - ideal base, 315–316
 - relaxer basics, 313–315
 - structured, 101–102

T

- TAP (Texture Awareness Program), 16
- technologies
- conditioner advancements, 104–105
 - multifunctional hair dye, 102–104
 - old challenges, 99–100
 - parallel material production and testing, 105–106
 - polymer recent changes
 - bimodal styling polymer*, 539–544
 - Croda conditioning polymer*, 544–548
 - Dow Corning conditioning polymer*, 549–552
 - structured surfactants, 101–102
- texture analysis
- hair fixatives, 480–484
 - packaging, 484–485
 - shampoo extrusion testing, 477–480
 - using to substantiate care claims
 - conditioners and conditioning shampoos*, 517–519
 - dynamic hair spray analysis*, 514–517
 - equipment*, 511–514
 - hair fixatives*, 519–525
- Texture Awareness Program (TAP), 16
- texturizing innovations, 27–28
- The Science of Hair Care*, 318
- thermal protection, Silicone Amino Elastomer
- Emulsion evaluation, 304–305
- thermal straightening, ethnic hair grooming, 62–63
- thickeners, hair dye polymers, 397–407
- thickening shampoos, hair care formulary, 557
- Tinea capitis, ethnic scalp disorders, 64
- torsion pendulum, 487
- results, 489–491
 - testing, 488–489
- Traction alopecia, ethnic scalp disorders, 64, 65–66
- treatments, hair care formularies, 573–575
- trends
- Asia Pacific, 9
 - Brazil, 10
 - China, 10
 - complacency not option, 12–13
 - conditioners sales growth, 11
 - Eastern Europe, 9
 - Latin America, 9
 - mega brands, 13
 - shampoo continued sales, 10–11
 - styling agents, 11–12
- triple protein shampoos, hair care formulary, 563

U

- UV radiation, 447–448
- keratin biopolymers hair protection, 442–444
 - polysilicone-15, 448–449
 - enhancing hair shine*, 455–457
 - hair structure protection*, 452–455
 - protecting hair combability*, 449–452
- UVB damages, ethnic hair myths, 30–31

V

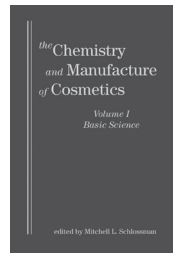

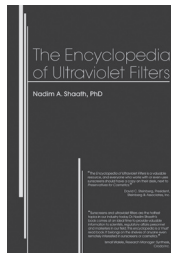

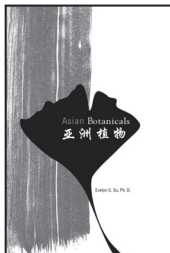

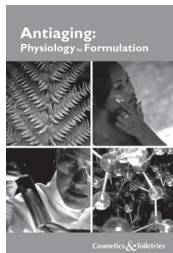

- vegetable esters, care benefits
- effects on hair, 158–166
 - functions in cleansing, 155–158
- VOCs (volatile organic compounds)
- formula strategies, 274–276
 - history of regulations, 272–273
- volatile organic compounds (VOCs)
- formula strategies, 274–276
 - history of regulations, 272–273
- volume, silicone quaternary microemulsions, 235–239
- volumizing gels, hair care formulary, 565
- volumizing shampoos, hair care formulary, 556
- VP/methacrylamide/vinylimadazole copolymer, 361–363
- mechanical properties, 363–365
 - testing gel or mousse properties, 366–371

W–Z

- Warren, Chuck, ethnic hair, 39–41
- wash 'n style shampoos, hair care formulary, 557

Other personal care technology books from
Allured Publishing Corporation

Antiaging: Physiology to Formulation
Asian Botanicals
Beginning Cosmetic Chemistry
Biotechnology in Cosmetics: Concepts, Tools and Techniques
The Chemistry & Manufacture of Cosmetics
Volume I – Basic Science
Volume II – Formulating
Volume III – Ingredients (2 book set)
Cosmeceuticals: Active Skin Treatment

Formulating for Sun
Fragrance Applications: A Survival Guide
Personal Care Formulas
Physiology of the Skin II
Preservatives for Cosmetics 2nd Edition
Silicones for Personal Care
Skin Care: Theories & Applications
Surfactants: Strategic Personal Care Ingredients

New in 2007...

Naturals and Organics in Cosmetics: From R&D to the Marketplace
- Collection of articles on organic/natural ingredients in cosmetics.

The Encyclopedia of Ultraviolet Filters
- Comprehensive compilation of data on every ultraviolet filter approved for sunscreen use worldwide!

Patent Peace of Mind
- A thorough review of the patent process.

Coming Soon...

Science and Applications of Skin Delivery Systems
- Comprehensive coverage of the challenges, measurement and future of novel delivery systems
